1. INTRODUCTION

Keyword research is an important part of Search Engine Optimization (SEO) and digital marketing. It involves identifying the search terms that users enter into search engines and analyzing their search volume, keyword difficulty, competition and search intent.

This project focuses on conducting keyword research for FreeInternships.in, an online internship platform offering free internship opportunities in areas such as digital marketing, web development, Python, Java, AI & Data Science, graphic design and other technology-related fields.

The purpose of this research is to identify relevant keywords that match the website's internship-focused audience and can support its SEO and content strategy.

The research covers seed keyword identification, keyword expansion, long-tail and question-based keywords, search volume and difficulty analysis, search intent, competitor analysis, keyword clustering, prioritization and content planning.

The analysis also considers competitor websites and internship platforms such as Internshala, Indeed and the AICTE Internship Portal to understand the search landscape and identify potential areas of opportunity.

2. OBJECTIVE OF KEYWORD RESEARCH

The main objectives of this keyword research project are:

1. To identify relevant seed keywords related to internships and digital marketing.

2. To expand the seed keywords into long-tail and related search terms.
3. To identify question-based keywords related to internship searches.
4. To analyze the search volume and keyword difficulty of identified keywords.
5. To understand the search intent behind different keywords.
6. To analyze keyword competition in the internship sector.
7. To study keywords used by major competitors such as Internshala, Indeed and AICTE.
8. To identify potential keyword gaps and SEO opportunities for FreeInternships.in.
9. To organize keywords into relevant categories and topic clusters.
10. To prioritize keywords based on their potential value and difficulty.

11. To identify content opportunities and develop content pillars.

12. To create a keyword-based content calendar for future SEO and content marketing activities.

3. WEBSITE OVERVIEW — FREEINTERNSHIPS.IN

FreeInternships.in is an online internship platform operated by Data Alcott Systems. The website provides free online internship opportunities for students and learners across multiple technical and digital domains.

The website includes internship programs in areas such as:

Free Digital Marketing Internship

Free Graphics Design Internship

Free Video Editing Internship

Free Web Development Internship

Free Python Full Stack Internship

Free Java Full Stack Internship

Free AI & Data Science Internship

Free Embedded & VLSI Internship

The website also provides dedicated pages related to online and student internships, including:

Free Internship Online

Free Internship with Certificate

Free Internship for Students

Free Internship for CSE Students

Free Internship in Chennai

Free Internship in Chennai Online

The website provides features such as student registration, student login, certificate verification, evaluation verification, intern talent pool and company registration.

According to the website information provided for this project, FreeInternships.in had a displayed total traffic count of approximately 121.568K, with India being the largest listed source of visitors.

The website's target audience primarily includes students, freshers and individuals seeking online, free, virtual and skill-based internship opportunities.

3.1 Website Contact Information

Company: Data Alcott Systems

Website: FreeInternships.in

Email: mail@freeinternships.in

Phone: +91 9600095045

Location mentioned on website: Chennai

Working Days: Monday–Saturday

Working Hours: 11:00 AM–5:00 PM

3.2 Keyword Research Tools

The task instructions specified the use of the following tools/resources for keyword research:

Ahrefs

SEMrush

Google Keyword Planner

Ubersuggest

AnswerThePublic

The keyword dataset used in this report was based on the keyword and competitor data collected during the research process.

4. SEED KEYWORD IDENTIFICATION

Seed keywords are broad, core terms that represent the main topics of a website. They are used as the starting point for keyword expansion and further SEO analysis.

For FreeInternships.in, the seed keywords were selected based on the website's internship-focused niche, particularly free, online, remote, virtual and digital marketing internships.

4.1 Identified Seed Keywords

S. No.	Seed Keyword	Main Topic
--------	--------------	------------

- | | | |
|---|------------------------------|-------------------------------------|
| 1 | Digital marketing internship | Digital Marketing Internships |
| 2 | Free internship | Free Internships |
| 3 | Work from home internship | Remote / Work-from-Home Internships |
| 4 | Remote internship | Remote Internships |
| 5 | SEO internship | SEO Internships |
| 6 | Virtual internship | Virtual Internships |
| 7 | Online internship | Online Internships |

A total of 7 seed keywords were identified, which satisfies the task requirement of identifying 5–10 seed keywords.

These seed keywords were subsequently used to identify long-tail keywords, related keywords, question-based keywords and other search opportunities relevant to FreeInternships.in.

5. KEYWORD EXPANSION

Keyword expansion is the process of developing a broader set of relevant search terms from the identified seed keywords. It helps identify specific queries that users may search when looking for internship opportunities.

For this project, the seven seed keywords were expanded into keywords covering different internship requirements, including:

Student internships

Free internships

Online internships

Work-from-home internships

Remote internships

SEO internships

Digital marketing internships

Virtual internships

Internships for freshers

Internships with stipends

Internships with certificates

The expanded keyword dataset contains information such as search volume, keyword difficulty (KD), CPC, search intent, competition and topic, wherever the corresponding data was available in the collected dataset.

5.1 Long-Tail Keywords

Long-tail keywords are more specific search queries generally containing multiple words. They help target users with more specific internship requirements.

Examples identified in the research include:

Seed Topic	Long-Tail Keyword
------------	-------------------

Digital Marketing Internship	Digital marketing internship in India
Digital Marketing Internship	Digital marketing internship for freshers
Digital Marketing Internship	Digital marketing internship for students
Digital Marketing Internship	Digital marketing internship with stipend
Free Internship	Free internship for students
Free Internship	Free internship in India
Free Internship	Free internship for engineering students
Work From Home Internship	Work from home internship for students
Work From Home Internship	Work from home internship without experience
Work From Home Internship	Work from home internship for freshers
Remote Internship	Best remote internship programs in India
Remote Internship	Remote internship in software development
SEO Internship	Online SEO internship
SEO Internship	SEO internship in India
SEO Internship	SEO internship stipend
Virtual Internship	Virtual internship for students
Virtual Internship	Virtual internship with stipend
Virtual Internship	Virtual internship with certificate
Online Internship	Online internship for students in India
Online Internship	Online internship with stipend for Indian students

The complete keyword-level data is maintained in the Keyword Research Master spreadsheet.

5.2 Related Keywords

Related keywords are terms closely associated with the main internship topics and help broaden the website's topical relevance.

The research identified related themes around:

Digital Marketing

Online marketing internship

Digital marketing internship in India

Digital marketing internship for freshers

Digital marketing internship for students

Digital marketing internship with stipend

Free Internships

Free internship for students

Free internship in India

Free online internship

Summer internship free

Free internship abroad

Remote / Work From Home

Internship work from home

Work from home internship opportunities

Work from home internship for students

Remote internship programs

Remote internship opportunities

SEO

Online SEO internship

SEO internship in India

SEO internship stipend

Best SEO internship programs

SEO internship in Bangalore

Virtual / Online

Virtual internship for students

Online internship in India

Best virtual internship programs

Virtual internship with certificate

Online internship for engineering students

These related terms can be used to create supporting content around the website's main internship topics.

5.3 Question-Based Keywords

Question-based keywords are search queries that indicate users are looking for specific information or guidance. The research identified several how and what based queries.

Question	Keyword	Volume	KD	Intent
How to get digital marketing internship	40	30	Informational	
How to get free internship	500	58	Transactional	
How to get work from home internship	900	45	Informational	
How to apply for work from home internship	150	47	Informational	
How to get remote internship	350	58	Informational	
How to apply for remote internship	220	55	Transactional	
How to get SEO internship	4,000	85	Informational	
What are the skills required for SEO internship	2,700	90	Informational	
How to apply for SEO internship	1,800	80	Informational	
How to get virtual internship	2,600	46	Informational	
How to apply for online internship in India	10	0	Transactional	

These question keywords can be used particularly for informational blog posts, how-to guides, FAQs and supporting landing-page content.

6. SEARCH VOLUME & KEYWORD DIFFICULTY ANALYSIS

Search volume and Keyword Difficulty (KD) were analyzed to understand the potential demand and level of competition associated with the identified keywords.

Search Volume represents the monthly search volume available in the collected keyword dataset, while Keyword Difficulty (KD) indicates the relative difficulty of ranking for a keyword.

The collected data shows opportunities across different internship categories, including digital marketing, free, work-from-home, remote, SEO, virtual and online internships.

6.1 High Search Volume Keywords

Keyword	Search Volume	KD
Remote internship opportunities	12,000	68
seo internship	8,200	65
Online internship in India	8,200	63
digital marketing internship	5,500	72
Virtual internship for students	5,300	51
How to get seo internship	4,000	85
Best virtual internship programs	3,900	59
free internship for students	3,500	71
best seo internship in india	3,500	80
online seo internship	3,200	75

The data shows that broad internship-related keywords can have substantial search demand. However, several high-volume keywords also have relatively high KD, meaning search volume should not be considered alone when selecting target keywords.

6.2 Lower-Difficulty Opportunities

The collected dataset also contains keywords with comparatively lower KD values.

Keyword	Search Volume	KD	Intent
Digital marketing internship with stipend	5	2	Informational
How to apply for online internship in India	10	0	Transactional
Best digital marketing internship program	15	10	Commercial
Online internship experience in India	20	10	Informational
Digital marketing internship salary in India	20	20	Informational
Online internship with stipend for Indian students	30	20	Informational
How to get digital marketing internship	40	30	Informational
How to get virtual internship	2,600	46	Informational

These keywords may provide more accessible opportunities compared with keywords having higher difficulty.

6.3 Key Observation

The analysis indicates that high search volume and low keyword difficulty do not always occur together.

For example, “How to get virtual internship” has a search volume of 2,600 and KD of 46, while “What are the skills required for SEO internship” has a search volume of 2,700 but KD of 90.

Therefore, keyword selection should consider a combination of:

Search volume

Keyword difficulty

Search intent

Relevance to FreeInternships.in

Competition

Content opportunity

-

7.5 Search Intent Strategy

For FreeInternships.in, content should be aligned with the intent behind each keyword rather than targeting every keyword with the same type of page.

Search Intent Suitable Content

Informational Blogs, guides, FAQs

Commercial Comparison/list pages

Transactional Internship/application pages

Navigational Website and platform-specific pages

This intent-based approach can help FreeInternships.in create content that better matches users' search needs.

8. KEYWORD COMPETITION ANALYSIS

Keyword competition was evaluated using the Competition and Keyword Difficulty (KD) values available in the collected keyword dataset.

The dataset contains keywords with different competition levels, ranging from Low to Medium and High.

Examples of lower-competition keywords include:

Online marketing internship

How to get digital marketing internship

Digital marketing internship salary in India

How to get virtual internship

How to apply for work from home internship

Examples of higher-competition keywords include:

Free online internship

Work from home internship opportunities

Best work from home internship programs

SEO internship

Online SEO internship

Best SEO internship programs

Key Finding

The website should not rely only on broad, highly competitive keywords. A balanced strategy can combine:

Broad/high-demand keywords → long-term SEO targets

Specific/lower-difficulty keywords → more focused content opportunities

Question keywords → informational traffic and supporting content

Transactional keywords → application and conversion-focused pages

This creates a more balanced keyword strategy for FreeInternships.in.

9. COMPETITOR ANALYSIS

Competitor analysis was conducted to understand how major internship and employment platforms perform for relevant search queries. The competitor data collected for this project includes Internshala, Indeed and the AICTE Internship Portal.

The analysis focuses on the keywords for which these competitors were observed ranking, along with their position, search volume, keyword difficulty, CPC, traffic percentage, search intent and SERP features.

9.1 Internshala

Internshala is a major platform focused on internships and student employment opportunities. The collected data shows that Internshala ranks for several high-volume internship and job-related keywords.

Internshala Keyword Data

Keyword	Position	Volume	KD	CPC (USD)	Traffic %	Intent
internshala	1	673,000	56% - Difficult	\$0.10	33.22%	M
work from home jobs	3	673,000	40% - Possible	\$0.05	2.90%	G
internshala internship	1	18,100	45% - Possible	\$0.03	0.89%	M
internshala login	1	14,800	37% - Possible	\$0.17	0.73%	N, T
internshala jobs	1	14,800	49% - Possible	\$0.03	0.73%	G
hackathon	1	90,500	63% - Difficult	\$1.55	0.64%	I
internship	3	201,000	44% - Possible	\$0.08	0.62%	I
kaha	1	74,000	33% - Possible	\$0.00	0.52%	I
data entry jobs	4	165,000	31% - Possible	\$0.04	0.50%	G

Observation:

Internshala has visibility across broad terms such as “internship” and “work from home jobs”, as well as branded searches such as “internshala jobs” and “internshala internship.” This indicates strong visibility across both internship-specific and broader job-related searches.

9.2 Indeed

Indeed is a large employment and job-search platform. The collected data shows particularly strong visibility for branded job-search keywords.

Indeed Keyword Data

Keyword	Position	Volume	KD	CPC (USD)	Traffic %	Intent
indeed	3	1,220,000	72% - Hard	\$0.19	75.26%	N
indeed jobs	2	165,000	78% - Hard	\$0.04	18.90%	G, N
indeed job alert	2	27,100	77% - Hard	\$0.00	1.67%	G, N
ineed	3	12,100	65% - Difficult	\$0.14	0.95%	N
indeed india	4	14,800	63% - Difficult	\$0.06	0.91%	N
indeed job search	3	6,600	64% - Difficult	\$0.04	0.52%	G, N
indeed job vacancies	2	5,400	77% - Hard	\$0.03	0.42%	G, N
indeed job portal	3	6,600	64% - Difficult	\$0.06	0.29%	G, N
indeed com jobs	2	3,600	74% - Hard	\$0.04	0.28%	G, N
indeed job application	3	4,400	63% - Difficult	\$0.04	0.19%	G, N
www indeed jobs com	2	1,300	62% - Difficult	\$0.04	0.10%	G, N

Observation:

Indeed's collected ranking data is dominated by branded and job-search terms. The highest traffic percentage in the dataset is associated with the keyword "indeed", at 75.26%.

9.3 AICTE Internship Portal

The AICTE Internship Portal is another important competitor/reference platform in the internship search space. The collected data shows strong rankings for internship-related and branded AICTE

searches.

AICTE Keyword Data

Keyword	Position	Volume	KD	CPC (USD)	Traffic %	Intent
aicte internship	1	74,000	33% - Possible	\$0.10	28.14%	N
aicte	1	201,000	50% - Difficult	\$0.36	18.73%	N
national internship portal	1	33,100	62% - Difficult	\$0.13	12.58%	N
internship	1	201,000	44% - Possible	\$0.08	8.60%	I
aicte internship login	1	8,100	45% - Possible	\$0.00	3.08%	N, T
aicte internship portal	1	5,400	25% - Easy	\$0.48	2.05%	N
aicte login	1	14,600	24% - Easy	\$0.00	0.91%	N, T
portal internship	2	14,800	62% - Difficult	\$0.13	0.91%	I
aicte student login	1	2,400	27% - Easy	\$0.00	0.91%	N, T
internship aicte india org	1	2,400	58% - Difficult	\$0.10	0.91%	N

Observation:

AICTE shows strong visibility for terms directly related to its brand and internship portal. It also ranks at position 1 for “internship” in the collected dataset.

9.4 Competitor Comparison

Competitor	Main Keyword Strength Observed
------------	--------------------------------

Internshala Internships, work-from-home jobs, student/job-related searches

Indeed Job searches, job vacancies and branded searches

AICTE Internship Portal AICTE internship, national internship portal and internship-related searches

Overall Competitor Finding

The competitor data indicates that different platforms have different keyword strengths:

Internshala has strong visibility across internship and work-from-home related searches.

Indeed has strong visibility across broad job-search and branded queries.

AICTE has strong visibility around internship portal and AICTE-specific searches.

For FreeInternships.in, these competitor patterns provide useful direction for targeting relevant free, online, remote, virtual, SEO and digital marketing internship keywords, rather than attempting to compete only for competitor-branded terms.

10. COMPETITOR KEYWORD ANALYSIS

Competitor keyword analysis was conducted to understand the types of keywords for which Internshala, Indeed and the AICTE Internship Portal were observed ranking in the collected data.

The analysis focuses on the keyword themes, search demand, ranking positions, difficulty and intent observed for each competitor.

10.1 Internshala — Keyword Analysis

Internshala's collected keywords cover several major search themes:

Keyword Theme	Examples from Collected Data	Observation
Brand	internshala, internshala internship, internshala jobs	Strong branded visibility
Internship	internship	Visibility for broad internship search
Work From Home	work from home jobs	Visibility for remote/work-from-home searches
Jobs	data entry jobs	Visibility beyond internships
Competitions	hackathon	Additional student-oriented search visibility
Login	internshala login	Strong navigational visibility

Key finding: Internshala has visibility across both internship-specific and broader employment-related searches.

10.2 Indeed — Keyword Analysis

Indeed's collected keywords are primarily associated with its brand and job-search functionality.

Keyword Theme	Examples from Collected Data	Observation
Brand	indeed, indeed india	Strong branded visibility
Jobs	indeed jobs, indeed com jobs	Job-search visibility
Job Search	indeed job search	Search-related visibility
Vacancies	indeed job vacancies	Job vacancy searches
Job Portal	indeed job portal	Portal-related searches
Application	indeed job application	Application-related searches
Job Alerts	indeed job alert	Job-alert searches
Login / Navigation	Branded navigational terms	Strong navigational intent

Key finding: Indeed's dataset is strongly concentrated around job-search and branded queries, with relatively high KD values across many terms.

10.3 AICTE Internship Portal — Keyword Analysis

The AICTE dataset is strongly concentrated around internship-portal searches.

Keyword Theme	Examples from Collected Data	Observation
AICTE Internship	aicte internship	Strong internship-specific visibility
National Portal	national internship portal	Strong portal-related visibility
Internship	internship	Broad internship visibility
Login	aicte internship login, aicte login	Navigational and transactional searches

Student Access	aicte student login	Student-oriented portal search
Internship Portal	aicte internship portal	Direct portal-related search

Key finding: AICTE has strong visibility for internship portal, AICTE and login-related searches, including position 1 for several terms in the collected dataset.

10.4 Competitor Keyword Comparison

Area	Internshala	Indeed	AICTE
Branded Keywords	Strong	Strong	Strong
Internship Keywords	Strong	Limited in collected data	Strong
Work-from-home	Present	Not prominent in collected keyword export	Not prominent
General Jobs	Present	Strong	Limited
Internship Portal	Present	Limited	Strong
Login / Navigational	Strong	Strong	Strong
Student-focused searches	Present	Less prominent	Present

Overall Finding

The competitor research shows that the three competitors have different keyword strengths.

Internshala is particularly relevant for internship and work-from-home searches, Indeed is stronger in general employment and job-search terms, while AICTE is strongly associated with internship-portal searches.

For FreeInternships.in, the most relevant areas for further SEO development are therefore free internships, online internships, work-from-home internships, remote internships, virtual internships, SEO internships and digital marketing internships.

11. KEYWORD GAP ANALYSIS

Keyword gap analysis is used to identify relevant search themes where competitors have visibility and where opportunities may exist for FreeInternships.in.

Important: The available data does not provide a complete, verified one-to-one ranking comparison between FreeInternships.in and every competitor for the same keyword set. Therefore, this section identifies thematic keyword opportunities, rather than claiming an exact numerical keyword gap.

11.1 Identified Opportunity Areas

Opportunity Area	Competitor Evidence	FreeInternships.in Relevant Keywords
Internship	Internshala and AICTE rank for internship-related terms	internship, digital marketing internship
Work From Home	Internshala ranks for work from home jobs	Work from home internship India
Remote Internship	Competitor SERP results include remote internship listings	Remote internship, remote internship programs
Free Internship	Competitor SERP includes free internship results	Free internship for students, free internship in India

SEO Internship Internshala, Indeed and other SERP competitors appear for SEO internship
seo internship, online seo internship

Virtual Internship Competitor SERP results include virtual internship opportunities Virtual
internship for students

Online Internship Competitor SERP includes online internship results Online internship in India

11.2 Strategic Keyword Opportunities

Based on the collected keyword data, the following areas are particularly relevant to
FreeInternships.in:

Free internship for students

Free internship in India

Free online internship

Work from home internship India

How to get work from home internship

Remote internship

SEO internship

Digital marketing internship

Virtual internship for students

Online internship in India

These keywords are already present in the collected dataset and therefore do not require introducing new keyword data.

Conclusion of Gap Analysis

The analysis suggests that FreeInternships.in can strengthen its SEO presence by developing dedicated pages and supporting content around free, online, remote, virtual, SEO and digital marketing internships. These themes closely match both the website's existing offerings and the search demand identified during keyword research.

Bilkul. Ab sirf final report mein paste karne layak content de rahi hoon. Jo data tumne provide kiya hai, usi basis par hai—koi naya keyword/number add nahi kar rahi.

10. Keyword Clustering & Topic Clusters

The researched keywords were grouped into topic clusters based on their common search themes and user intent. This helps FreeInternships.in organize its SEO content around major internship-related topics.

Cluster 1: Digital Marketing Internships

Pillar Topic: Digital Marketing Internship

Keywords:

Digital marketing internship

Online marketing internship

Digital marketing internship in India

Digital marketing internship for freshers

Digital marketing internship for students

Digital marketing internship with stipend

Digital marketing internship application

Digital marketing internship salary in India

How to get digital marketing internship

Best digital marketing internship program

Content Focus: Digital marketing internship opportunities, application guidance, student/fresher opportunities and internship benefits.

Cluster 2: Free Internships

Pillar Topic: Free Internship Opportunities

Keywords:

Free internship for students

Free internship in India

Free online internship

Summer internship free

Free internship abroad

Free internship for engineering students

Free internship in Bangalore

Free internship for BSc students

How to get free internship

Content Focus: Free internship opportunities for students, engineering students, BSc students and users looking for online opportunities.

Cluster 3: Work-from-Home Internships

Pillar Topic: Work-from-Home Internship

Keywords:

Work from home internship India

Internship work from home

Work from home internship opportunities

How to get work from home internship

Work from home internship for students

Work from home internship without experience

Work from home internship for freshers

Best work from home internship programs

Online work from home internship for students

How to apply for work from home internship

Content Focus: Remote internship opportunities, fresher opportunities, application guidance and work-from-home internships.

Cluster 4: Remote Internships

Pillar Topic: Remote Internship Opportunities

Keywords:

Remote internship

Remote internship programs

How to get remote internship

Virtual internship India

How to apply for remote internship

Online internship for students

Internship opportunities in India remote

Best remote internship programs in India

Remote internship in software development

Remote internship for international students

Content Focus: Remote internship programs and opportunities for students, freshers and specialized fields.

Cluster 5: SEO Internships

Pillar Topic: SEO Internship

Keywords:

SEO internship

Digital marketing internship

How to get SEO internship

Best SEO internship in India

Online SEO internship

What are the skills required for SEO internship

SEO internship stipend

SEO internship in Bangalore

Best SEO internship programs

How to apply for SEO internship

Content Focus: SEO career opportunities, required skills, applications, stipend-related searches and SEO internship programs.

Cluster 6: Virtual Internships

Pillar Topic: Virtual Internship Programs

Keywords:

Remote internship opportunities

Online internship in India

Virtual internship for students

Best virtual internship programs

How to get virtual internship

Virtual internship for fresher

Virtual internship for engineering students

Virtual internship with stipend

Virtual internship for IT students

Virtual internship with certificate

Content Focus: Virtual internships, student opportunities, fresher opportunities, certificates and stipend-related searches.

Cluster 7: Online Internships

Pillar Topic: Online Internship Opportunities

Keywords:

Online internship

Online internship for students in India

Best online internships in India

Online internship with stipend for Indian students

Online internship experience in India

How to apply for online internship in India

Online internship for engineering students in India

Online internship for data science students in India

Content Focus: Online internship opportunities for students and specialized educational backgrounds.

11. Keyword Prioritization

Keywords were prioritized according to their search volume, keyword difficulty, search intent and relevance to the website's internship niche.

High-Priority Keywords

Keyword	Volume	KD	Intent
---------	--------	----	--------

SEO internship	8,200	65	Commercial
Digital marketing internship	5,500	72	Commercial
How to get SEO internship	4,000	85	Informational
Best SEO internship in India	3,500	80	Commercial
Free internship for students	3,500	71	Informational
Online SEO internship	3,200	75	Commercial
What are the skills required for SEO internship	2,700	90	Informational
How to get virtual internship	2,600	46	Informational
Free internship in India	2,400	67	Informational
Work from home internship India	1,900	42	Commercial

Medium-Priority Keywords

Remote internship

Remote internship programs

Work from home internship for students

Work from home internship for freshers

Virtual internship for students

Virtual internship for engineering students

Online internship for students in India

Free internship for engineering students

Digital marketing internship in India

Opportunity / Lower-Difficulty Keywords

These keywords have comparatively lower KD in the provided dataset:

Keyword	Volume	KD
---------	--------	----

Digital marketing internship with stipend 5	2	
Best digital marketing internship program	15	10
Digital marketing internship salary in India	20	20
Online internship experience in India	20	10
Online internship with stipend for Indian students	30	20
How to apply for online internship in India	10	0
How to get digital marketing internship	40	30
How to get virtual internship	2,600	46

12. Content Opportunities / Content Pillars

Based on the keyword clusters, five major content pillars can be developed for FreeInternships.in.

Pillar 1: Free Internship Opportunities

Content opportunities:

Free internships for students

Free internships in India

Free online internships

Free internships for engineering students

Free internships for BSc students

Pillar 2: Digital Marketing & SEO Internships

Content opportunities:

Digital marketing internships

SEO internships

SEO internship skills

SEO internship application process

Digital marketing internship with stipend

Pillar 3: Remote & Work-from-Home Internships

Content opportunities:

Work-from-home internships

Remote internships

Remote internships for freshers

Work-from-home internships without experience

How to apply for remote internships

Pillar 4: Virtual & Online Internships

Content opportunities:

Virtual internships for students

Online internships in India

Virtual internships with certificates

Virtual internships with stipend

Online internships for engineering students

Pillar 5: Student & Fresher Internship Guides

Content opportunities:

Internships for students

Internships for freshers

How to get an internship

How to apply for internships

Internship opportunities without experience

13. Content Calendar

A four-week content calendar can be created using the researched keywords.

Week	Content Topic	Primary Keyword	Intent
Week 1	Free Internships for Students in India	free internship for students	Informational
Week 1	How to Get a Work-from-Home Internship	how to get work from home internship	Informational
Week 2	Digital Marketing Internship Guide	digital marketing internship	Commercial
Week 2	How to Get an SEO Internship	how to get seo internship	Informational
Week 3	Best Virtual Internship Opportunities for Students	virtual internship for students	Informational
Week 3	Online Internships in India	online internship in India	Informational
Week 4	Digital Marketing Internship with Stipend	digital marketing internship with stipend	Informational
Week 4	How to Apply for an SEO Internship	how to apply for seo internship	Informational

The calendar covers different user needs including information seeking, internship discovery and application-related searches.

14. Recommendations

Based on the keyword research and competitor analysis, the following recommendations can be made for FreeInternships.in:

1. Focus on high-relevance internship keywords

The website should focus on keywords directly related to free, online, remote, virtual, digital marketing and SEO internships.

2. Build dedicated topic pages

Separate landing pages can be developed for major topics such as:

Free Internships

Digital Marketing Internships

SEO Internships

Remote Internships

Virtual Internships

Online Internships

3. Target long-tail keywords

Long-tail keywords such as “digital marketing internship for students”, “work from home internship for freshers” and “virtual internship with certificate” can help target more specific audiences.

4. Create informational content

Question-based keywords provide opportunities for guides and blog content, particularly around:

How to get an internship

How to apply for an internship

Skills required for SEO internships

How to get remote internships

5. Improve competitive positioning

Competitor analysis shows that platforms such as Internshala, Indeed and AICTE rank for several high-volume internship and job-related searches. FreeInternships.in can differentiate itself by focusing strongly on free, online, virtual and certificate-based internship opportunities.

6. Use keyword clusters for internal linking

Pages belonging to the same topic cluster should be internally linked to strengthen topical relevance and navigation.

7. Prioritize lower-difficulty opportunities

Lower-KD keywords identified in the research can be used alongside competitive keywords to create opportunities for gaining organic visibility.

15. Conclusion

The keyword research for FreeInternships.in identified a broad range of opportunities across free internships, digital marketing internships, SEO internships, remote internships, virtual internships and online internships.

The research included seed keyword identification, keyword expansion, search volume and keyword difficulty analysis, search intent classification, competitor analysis, keyword clustering and prioritization.

The competitor review of Internshala, Indeed and AICTE shows that the internship search space contains strong competition for broad internship-related terms. Therefore, FreeInternships.in can build a focused SEO strategy around its specific strengths, particularly free, online, remote, virtual and certificate-based internship opportunities.

A combination of high-volume keywords, lower-difficulty opportunities, long-tail keywords and question-based content can provide a structured foundation for future SEO and content development.
